Frameless Black Glass Whiteboard

A super stylish and practical alternative to traditional whiteboards, the Frameless Black Glass Whiteboard is built with toughened 4mm safety glass that eliminates ghosting and staining. The design allows you to join multiple boards together to form a sleek and ultra-modern communication wall, with stylish chrome fixings floating the board 20mm off the wall. The low-iron qualities make the surface super clear while polished and rounded edges add to the functionality and safety of the board. The quality of materials used mean we can back the Frameless Black Glass Whiteboard with a lifetime surface warranty.
