

**Product
overview**

Lattice™ is a range of hanging sculptures built from a grid of acoustic fins. Covering a greater surface area than traditional parallel fin systems, Lattice effectively absorbs echo and reverberation in interior spaces. Lattice is made from 100% polyester fibre and is lightweight and structurally sound—holding form over its lifetime.

Specification

Suspended acoustic absorption system shall be Lattice made from thermally bonded polyester containing not less than 60% recycled material as manufactured by Autex. www.autexglobal.com

Lattice to be supplied unassembled with 4 x 1 m galvanised cables, 4 x ceiling mounts, 4 x "Velda" cable clips, 4 x alloy tube inserts. Install as per Lattice (Eclipse, Torus, Trapezium) Install Instructions.

Colour fastness to light

Lattice is suitable for indoor use only. Light fastness is dependent on use and exposure. Lattice has been evaluated to the following standard:
ISO 105-B02:2014
Rating: 6 (Highest = 7)

Colour fastness to rubbing

ISO 105-X12:2016
Dry rating: 4-5 (Highest = 5)
Wet rating: 4-5 (Highest = 5)

Pattern repeat

Non-woven. No pattern repeat but product has directional grain. Product may vary from samples and batch to batch due to fibre blending and lay-up, which is an inherent feature of this product.

Fabric care

Blot spills from fabric quickly. Wipe with a damp cloth. Avoid rubbing and excessive amounts of water as this will affect the finish. Use carpet or upholstery shampoo as directed. Blot with a clean dry cloth after each application of solution.

Custom printed Lattice requires the services of a specialist cleaning company. Refer to the Lattice Care and Maintenance Guide for more information.

Environmental

Autex Acoustics is committed to best practice through our ISO 14001 certified Environmental Management Systems.
