Lattice™

● Lattice™ Trapezium
in Ironbank

● Morgan Lovell,
New Zealand

Sculptural functionality

Delightfully abstract, yet calculated in form, Lattice™ is a range of hanging sculptures built from a grid of acoustic fins. With each intersection, Lattice covers a greater surface area than traditional parallel fin systems—effectively absorbing echo and reverberation in interior spaces. The Lattice range offers three standard designs, each suited to a variety of applications. Made from 100% polyester fibre, Lattice is lightweight and structurally sound—designed to hold shape throughout its lifetime.

Caring for the environment

Lattice is manufactured using 100% polyester fibre and contains a minimum of 60% recycled fibre (from PET plastics). Our products are designed to be recycled at the end of their life too.

We have continual improvement programmes in which we implement a range of initiatives to mitigate the environmental 'hotspots' that we have identified. Our products are GreenRate Level A, Health Product Declaration (HPD), and CDHP Standard certified.

Lattice is made from Cube which is DeclareSM certified to be Red List free and can be used in Living Building Challenge projects. Autex has a high functioning Environmental Management System (ISO 14001) to enhance our environmental performance and contribute to sustainable development.

Declare.
