

Frameless Colour Glass Whiteboard

The Frameless Colour Glass Whiteboard is built from toughened 6mm tempered glass. The non-porous surface is highly durable and will not ghost or stain - regardless of how long ink is left on. The low-iron qualities make the surface super clear and the colour vivid. Polished and rounded edges add to the functionality and safety of the board, while the frameless design creates a visually appealing appearance and allows the joining of boards together. Stainless steel barrel fixings float the board 20mm off the wall, conceal the fittings, and make for easy installation. Backed by a lifetime surface warranty, the Frameless Colour Glass Whiteboard is available in your choice of over 4,000 Dulux colours.
